Experience

Software Engineer

SS&C Advent • San Francisco, CA

02/2022 - Present

- Implemented the frontend of a loss harvesting trade program using React and Redux, that allowed users to quickly optimize short and long term losses across their portfolios.
- Built a portfolio details dashboard using Web Components and GraphQL endpoints that allowed for users to rapidly drill down into their positions.
- Used a JavaScript data visualization framework to craft dynamic SVG charts, enabling clients to easily identify key areas within their investments.
- Collaborated closely with backend developers to implement data-rich grids that effectively conveyed vital stock details, alerts, and trade session information.
- Wrote Karma tests and collaborated with QA/QE teams to ensure a high quality user experience at all times.
- Contributed to the company-wide design system built using native Web Components, which allowed components to be used with any frontend framework.

Senior Product Management Associate

Prudential Financial • San Francisco, CA

07/2020 - 02/2022

- Worked to build and enhance Prudential's retail/direct to consumer money management products.
- Analyzed and provided insights on client engagement data using Tableau and Adobe Analytics.
- Participated in design sprints aimed at rapidly prototyping and integrating user feedback as early as possible in the design process.
- Helped unblock and guide user stories to completion in an agile workplace.

Product Management Intern

Prudential Financial • Sunnyvale, CA

06/2019 - 08/2019

- Worked collaboratively with UX, UI, and backend engineers to develop intuitive workflows based on competitive research.
 - Helped review, summarize, and distribute results from multiple rounds of user testing for our product.
 - Created low fidelity wire frames and coordinated with UX teams to refine based on industry best practices.
