Summary

Software engineer with a track record of working well with stakeholders and delivering efficient solutions. By focusing on front end engineering, I have developed a strong understanding of how to utilize modern tech stacks to create reusable and extensible UI components. I am excited to continue expanding and enhancing my skillset as part of an excellent team.

Experience

Associate Software Engineer

SS&C Advent • San Francisco, CA   02/2022 - Present
- Developed front end interfaces for an enterprise focused SAAS product
- Utlized a modern tech stack including Sass, Lit (React-like JS framwork), Typescript, Cypress, Web Components, and Material
- Collaborated with teams of engineers, product managers, and designers to develop pixel perfect solutions based on client feedback
- Created extensible, reusable, and generic web componenets that fit into the companies overall design system
- Wrote and tested front end features using the cypress testing framework
- Leveraged a Javascript data visualiztion framework to create dynamic, data driven SVG charts
- Employed CSS variables to extend a maintainable front end platform

Senior Product Management Associate

Prudential Financial • San Francisco, CA   07/2020 - Present
- Worked to build and enhance Prudential's retail/direct to consumer products
- Analyzed and provided insights on KPI's using Tableau and Adobe Analytics
- Participated in design sprints aimed at providing the customer with the best experience possible

Product Management Intern

Prudential Financial • Sunnyvale, CA   06/2019 - 08/2019
- Helped guide web based finance product from concept to market
- Wrote user stories and crafted user flows for a scalable mobile digital experience

Education

B.S. Business Administration, Financial Management

California Polytechnic State University - San Luis Obispo • San Luis Obispo, CA   06/2020
Graduated with a 3.49 GPA
