Ryan Skeans

(951) 234-1872 | ryanskeans@gmail.com | San Diego, CA

Technical Skills

React, Web Components, Typescript, JavaScript, HTML, CSS, Sass, REST API's, GraphQL, Jest, Cypress, Web Services, Node.js, D3.js, Git, Python, Flask, SQL, Kubernetes, Tailwind CSS, GitHub Copilot, Claude Code

Experience

SS&C Technologies | San Diego, CA
Senior Software Engineer | 03/2026 - Present

- Owned the frontend architecture for core modules of the Genesis Portfolio Management platform, delivering a critical ecosystem used by wealth managers for daily trading and asset analysis.
- Spearheaded UI development for the largest enterprise client singing for our product to date, successfully onboarding 10K+ accounts and securing tens of billions in assets under management (AUM).
- Architected a frontend tax-loss harvesting application using React and Redux, empowering users to programmatically analyze and optimize short- and long-term capital losses across complex portfolios.
- Employed React and Web Components to create a dynamic portfolio management workspace, allowing users to effectively manage all their clients positions from one powerful hub.
- Implemented a customizable details dashboard utilizing GraphQL, enabling clients to tailor their workflows, dynamically filter financial data, and streamline account management.
- Modernized legacy web pages by migrating to a modern React stack, driving a ~30% optimization in Google Lighthouse performance scores.

SS&C Technologies | San Francisco, CA
Software Engineer | 02/2022 - 03/2026

- Collaborated closely with backend developers to shape API contracts and produce data-dense grids, enabling clients to consume vital market data and execute trades.
- Wrote Jest unit tests and collaborated with QA/QE teams to ensure a high quality user experience at all times.
- Contributed to the company-wide design system built using native Web Components, enabling seamless integration by teams using any frontend framework.
- Created interactive SVG charts using a Javascript data visualization framework, helping clients identify key investment insights.

Prudential Financial | San Francisco, CA
Senior Product Management Associate | 07/2020 - 02/2022

- Worked to build and enhance Prudential's retail/direct to consumer money management products.
- Analyzed and provided insights on client engagement data using Tableau and Adobe Analytics.
- Collaborated in design sprints to prototype features and iteraet quickly, significantly reducing development rework.
- Refined user stories and defined acceptance criteria to align business objectives with realistic technical timelines.

Prudential Financial | Sunnyvale, CA
Product Management Intern | 06/2019 - 08/2019

- Worked collaboratively with UX, UI, and backend engineers to develop intuitive workflows based on competitive research.
- Helped review, summarize, and distribute results from multiple rounds of user testing for our product.
- Created low fidelity wire frames and coordinated with UX teams to refine based on industry best practices.

Education

California Polytechnic State University | San Luis Obispo, CA
B.S. Finance | 06/2020
